

**Stake stable,
earn easily.**

 STABLECOMP

The Problem.

A user who wants to use DeFi to obtain returns in stablecoin faces several problems:

- 1 Understanding how complicated apps work.
- 2 Assessing the risks associated with the various DeFi products.
- 3 Comparing the returns, as each app uses different metrics.
- 4 Keeping track of the allocation and returns.

STABLECOMP

The Mission.

Stablecomp is the first DeFi platform to easily manage and earn interests on your stablecoins.

Stablecomp offers the automatic self-composition of all stable annuity opportunities present on several blockchains, sorting them into a risk/return matrix.

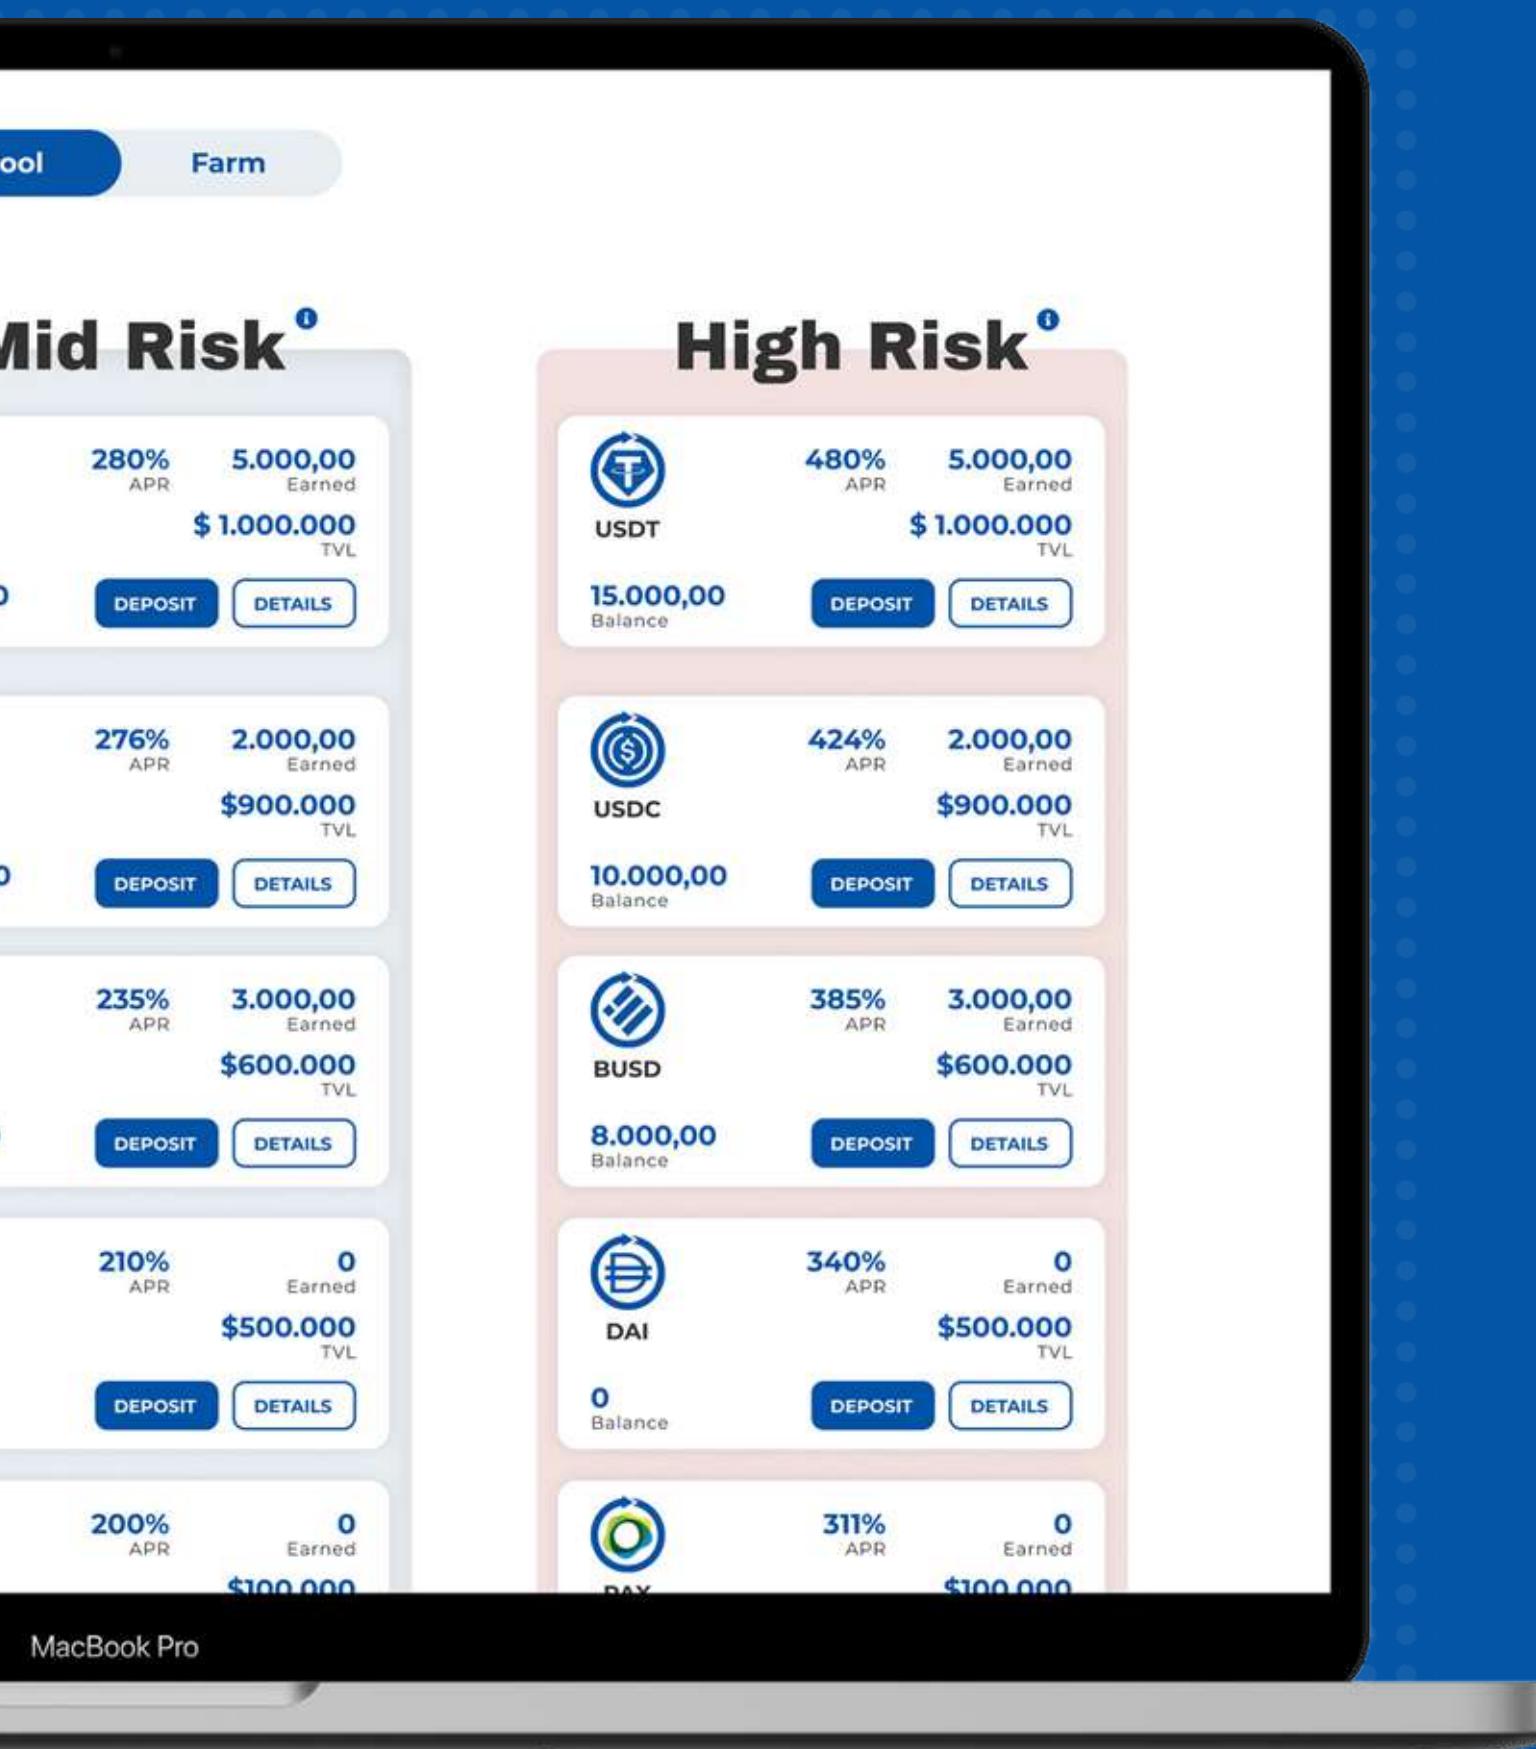

This easier farming mechanism allows for the depositing of any given single stablecoin.

The integrated analytics section allows users to monitor returns and assess diversification.

The Interface is intuitive and user-friendly.

Risk/Return

The Matrix.

There is no easy or intuitive interface on the market that allows for the sorting of opportunities by risk/return.

The matrix does the risk/return analysis for the user.

Rows: yield

Products divided by decreasing yield.
Returns calculated in a homogeneous and comparable way.

Columns: risk

Products divided into: low, medium, high risk.
Quantitative risk parameters to order projects.

Multichain

User can choose among several chains

BSC

Polygon

Avalanche

Ethereum

Mintlayer

A Blockchain for Financial Markets. Built on Bitcoin.

Mintlayer is a long-term, secure solution for scaling and accelerating the future of decentralized finance.

Tokenization Ecosystem

Decentralized Finance

Payments & Settlements

“

**Mintlayer allows Stablecomp to directly get in touch
with the liquidity on the BTC blockchain
in a secure and scalable way.**

Gianluca Landini - Stablecomp Founder

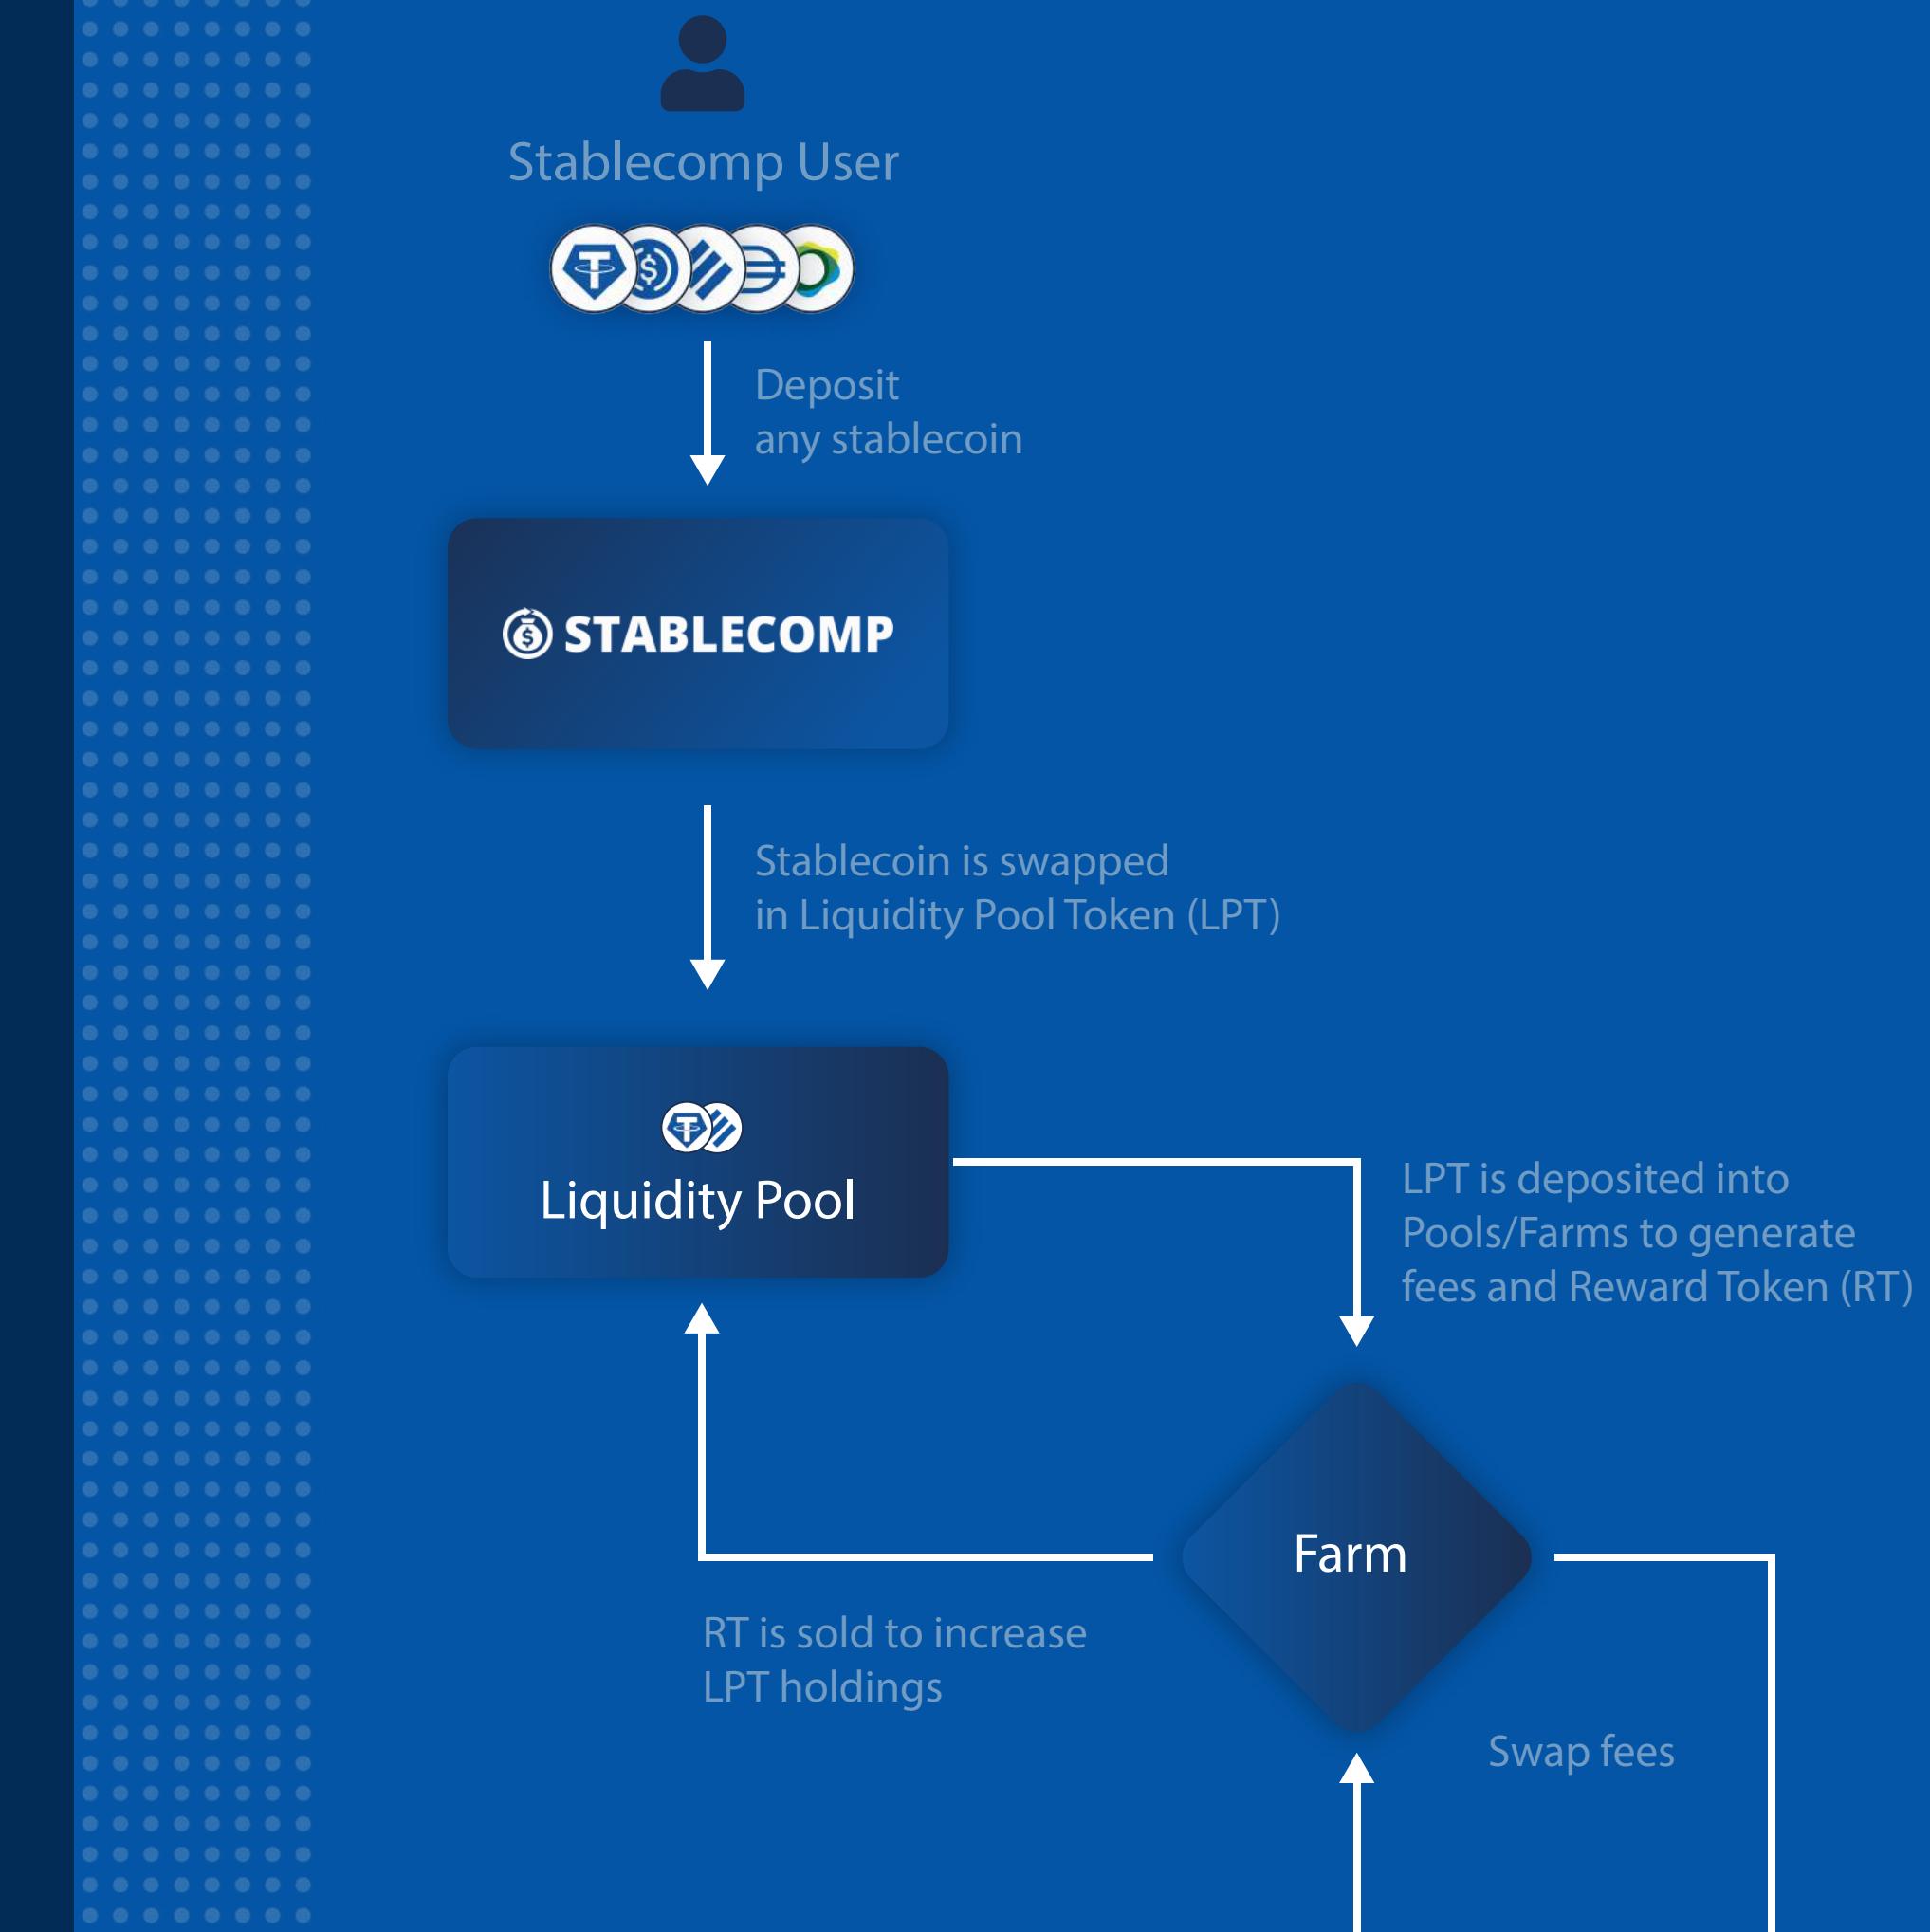

Automatic self-composition

Single assets farming:

Users only need one kind of stablecoin, and one click to farm.

Harvest:

Smart contract auto-harvest the reward token to autocompound the yield.

Analytics

Three simple graphs

Analyze asset
allocation.

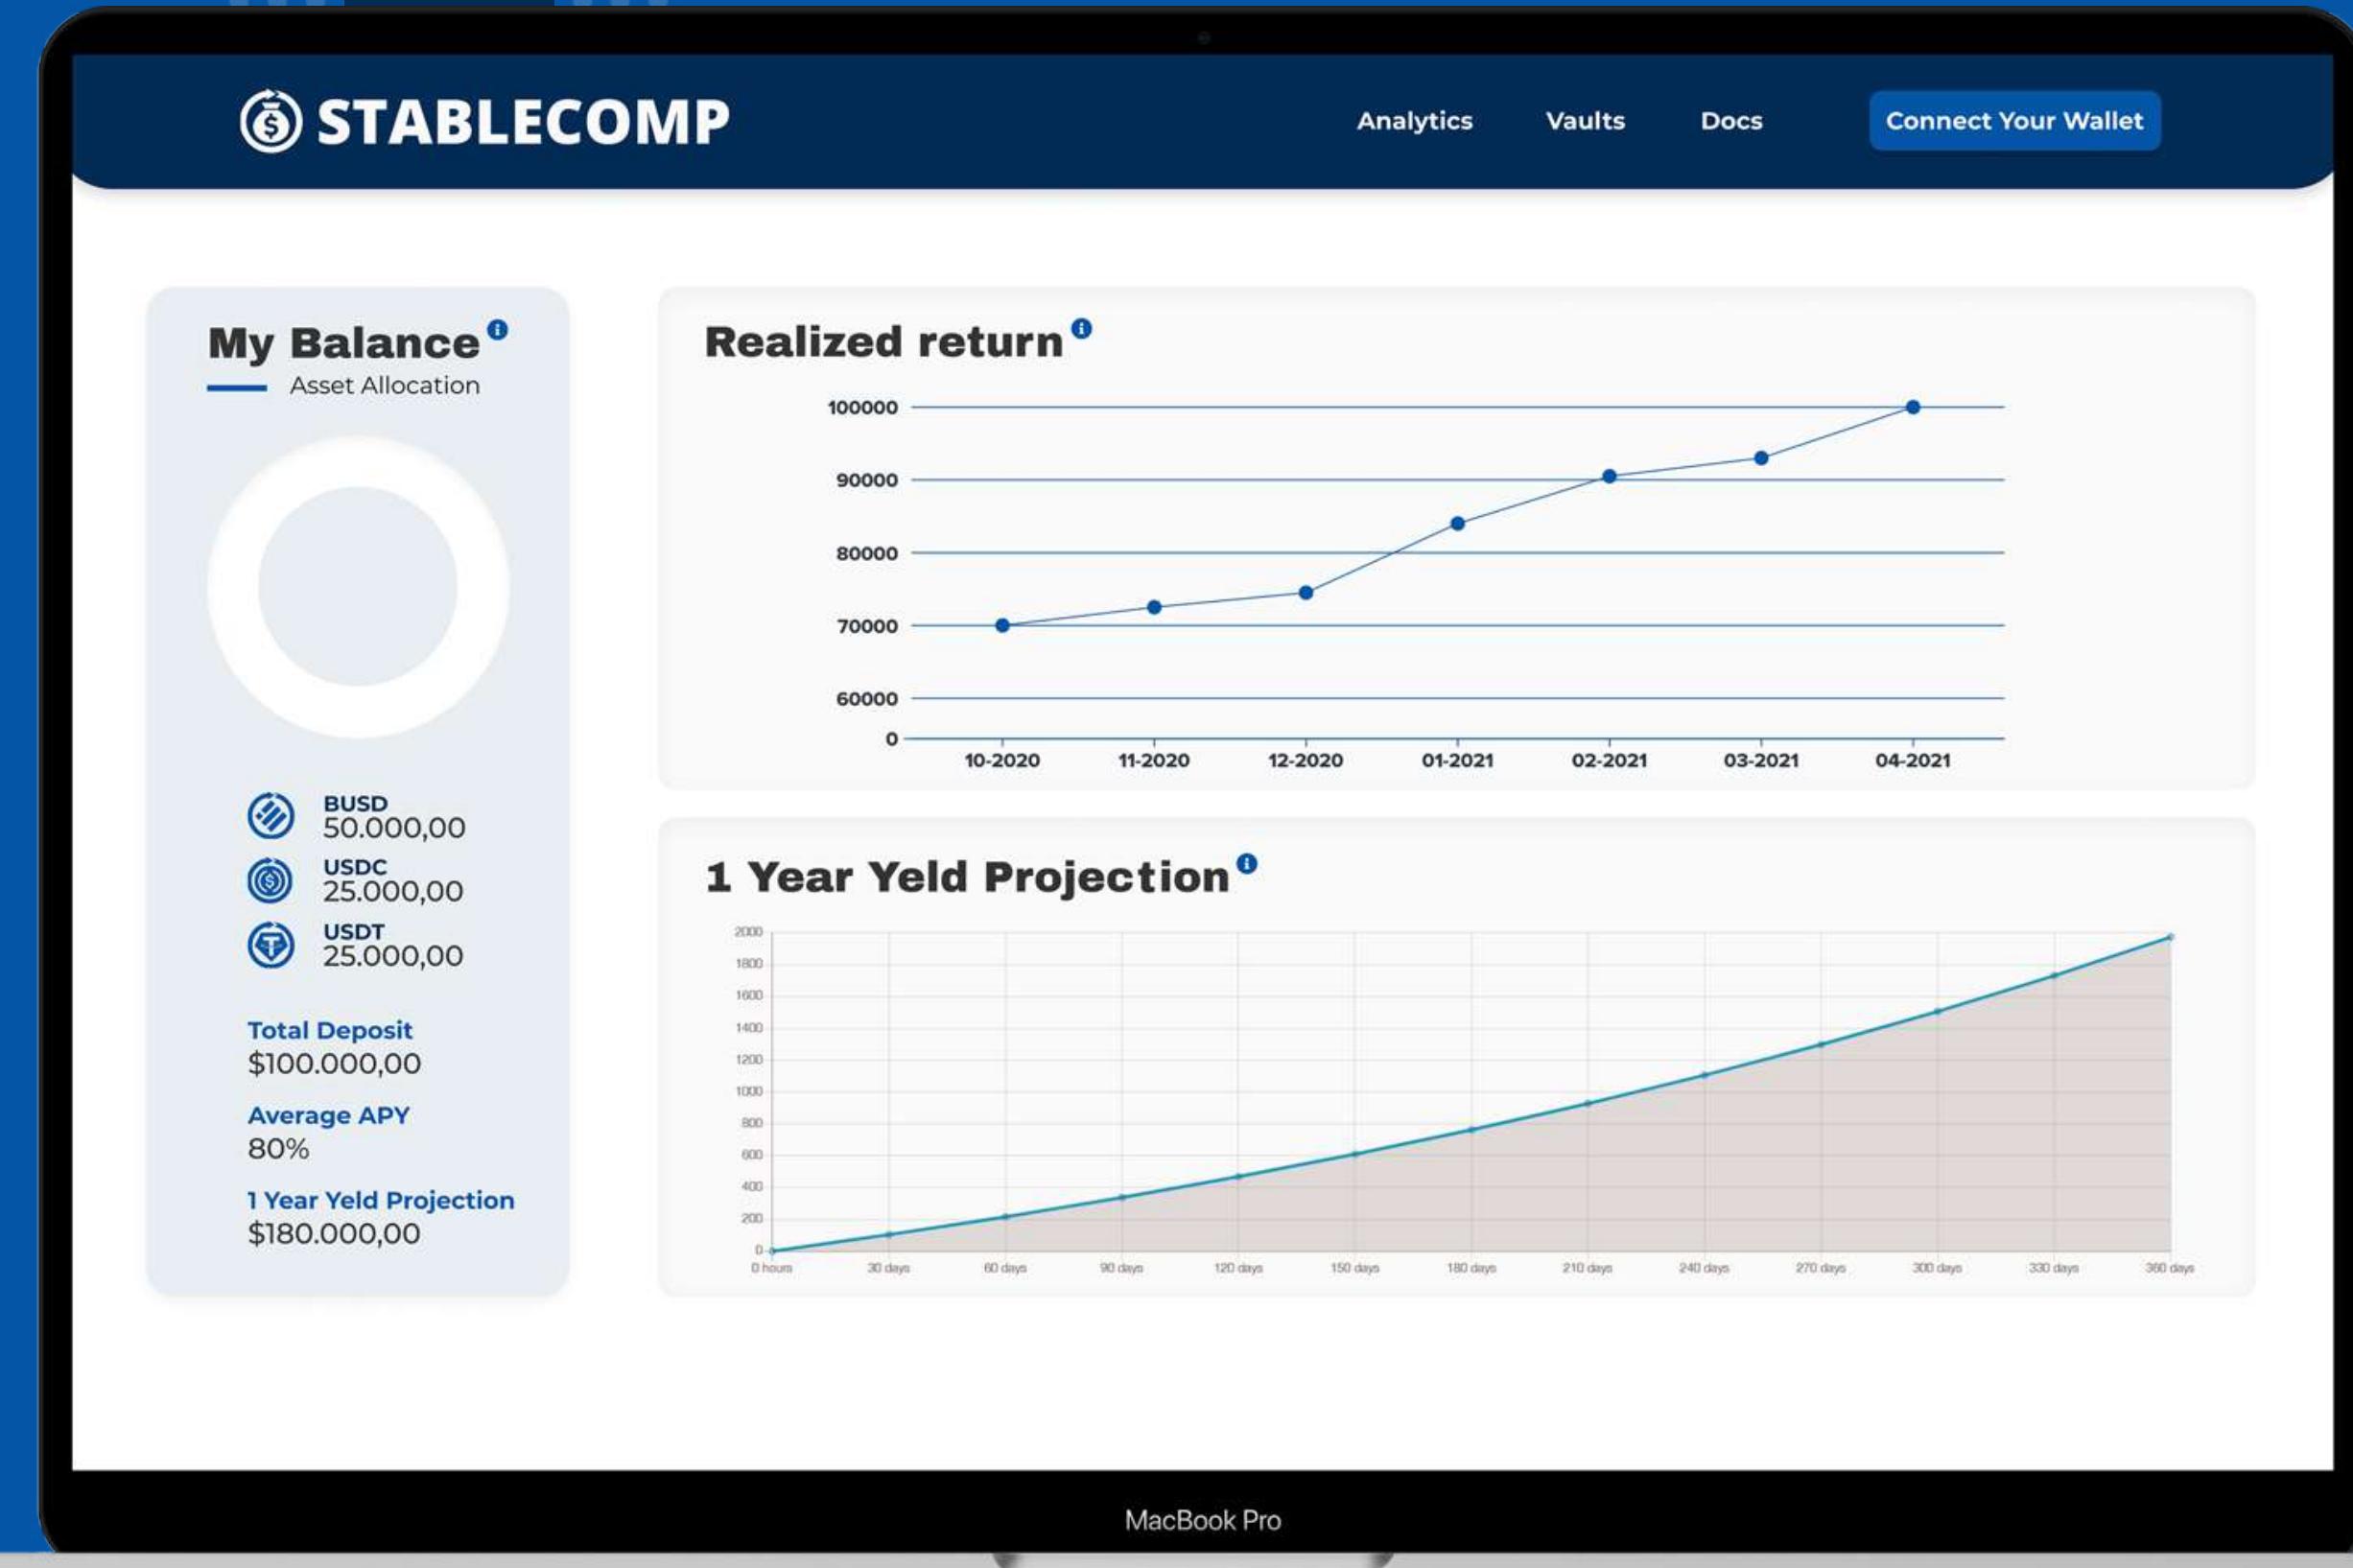

Visualize realized return
and average return.

View a 1-year
yield chart.

Analytics - UI

User Interface

MacBook Pro

Market

**Stablecoin TVL
in the top 10 apps
as of Aug 22th, 2021.**

These data do not consider
the stablecoins pooled
in tandem with other
cryptocurrencies.

1	AAVE	\$ 8,500,000,000
2	Maker	\$ 5,600,000,000
3	Curve	\$ 4,600,000,000
4	Compound	\$ 2,800,000,000
5	Ellipsis	\$ 920,000,000
6	PancakeSwap	\$ 860,000,000
7	Venus	\$ 776,000,000
8	Belt	\$ 657,000,000
9	SushiSwap	\$ 578,000,000
10	UniSwap	\$ 577,000,000
TOTAL		\$ 25,874,000,000

STABLECOMP and the Bear Market

If it's true that during a bull market token prices spike, it is also true that during a bear market people search for stablecoins, without the need to completely exit the market, waiting for the right opportunity to re-invest.

We expect the project to be successful and popular especially in bear market conditions.

SCOMP token

Governance.

scOMP is the native governance token of Stablecomp. By holding SCOMP token and staking it as part of our government mechanisms, users can directly take part in the decision-making process.

Limited token supply:

200,000,000 tokens with deflationary policy.

Initial distribution:

2-week period reward token.

Governance pool:

A portion of the fees paid by our yield farming vault users is distributed among holders of the SCOMP token staked in the pool which pays out rewards in SCOMP.

Comparison Chart

	Easy UI	Auto Comp	Focus on StableCoin	Analytics	Chain	Risk/Rew Grid	Farmable token?	TVL	FDV
STABLECOMP					BSC		No	\$500M*	\$140M*
Convex					ETH		Yes	\$6.5B	\$764M
Yearn.finance					ETH		No	\$4.8B	\$1.47B
Autofarm					BSC		Yes	\$904M	\$109M
Vesper					ETH		Yes	\$752M	\$516M
Beefy					BSC		No	\$528M	\$95M
Alchemix					ETH		No	\$564M	\$824M
Harvest					ETH		Yes	\$476M	\$170M

Community Incentives	5%	10,000,000					monthly over 12 months
Foundation	27%	56,000,000					4 mounths lock monthly over 20 months
Team & Advisors	15%	30,000,000					4 mounths lock monthly over 20 months
TOTAL	100%	200,000,000		1,960,000.00		\$ 720,000	

Roadmap

Q2 2021

- : Market research
- : Stablecomp idea was born

Q4 2021

- : Public sale
- : Product launch
- : R/R yield matrix on BSC
- : Smart Contract audit
- : Integrated chat

Q2 2022

- : Launch on Avalanche Chain
- : R/R Yield matrix on Avalanche
- : DAO formation (Governance)

Q4 2022

- : Launch on Mintlayer Chain
- : R/R Yield Matrix on Mintlayer
- : Yield Management Section
- : Debit Card

Q3 2021

- : Institutional private Sale
- : Project Initiation

Q1 2022

- : Launch on Polygon Chain
- : R/R yield matrix on Polygon
- : 1-Click staking
- : Analytics section
- : Launchpad SCOMP

Q3 2022

- : Launch on Ethereum Chain
- : R/R yield matrix on Ethereum
- : Mobile App
